**Subject: Case 13-F-0464
National Grid Island Park Energy Center -
A Repowering of the E.F. Barrett Power Station
Town of Hempstead, Nassau County, Long Island, New York
Bi-monthly Public Involvement Program Plan Tracking Report**

Dear Ms. Burgess:

This letter and enclosure are provided as the Public Involvement Program Tracking Report for the Island Park Energy Center, which proposes a repowering of National Grid's E.F. Barrett Power Station. Submittal of this tracking report is consistent with the Public Involvement Program (PIP) Plan that was submitted to the Commission on December 3, 2013.

The proposed repowering of the E.F. Barrett Power Station, if approved by the Long Island Power Authority, would result in a new modern energy center at the Barrett Station through the installation of new, state-of-the art electric generators and removal of all existing electric generating equipment currently on the site. The new energy center, which will be known as the "Island Park Energy Center", will provide a more efficient and cost-effective facility to produce electricity while minimizing impacts on the surrounding communities and providing tax benefits into the future.

The enclosed Meeting Log summarizes the actions that have already been taken with regard to the Project's Public Involvement Program and the planned future activities. National Grid has participated in a number of project stakeholder meetings since the last PIP Tracking Report in March. All public involvement meetings and activities to date are included in the attached updated Project Meeting Log.

Honorable Kathleen H. Burgess
New York State Public Service Commission
Empire State Plaza
Agency Building 3
Albany, NY 12223-1350
